HSC

http://www.dfgus.com/mechbinding/automatic_binder.html#hsc

HSC is a semi-automatic metal coil inserter machine with automatic forming, binding, cutting, and end finishing. HSC allows you to bind pre-punched documents like notebooks, calendars, manuals as fast as you can load book blocks.

- 300 to 800 books per hour, depending on size and operator skill
- On-Demand binding allows you to eliminate boxes of cut to length that can be damaged, and consolidates your entire metal coil inventory to easy to store spools
- The user-friendly control pad allows easy control for most functions without tedious manual adjustment.
- Ten times more efficient than manual binding
